

TERMS OF USE

Last updated: 09.10.2025

These Terms of Service (these “Terms” or this “Agreement”) are a contract between you and Hash Standard Inc. (“TeraHash,” “we,” “our,” or “us”) and governs your access or use of our website located at terahash.xyz (the “Platform”) and all related services and products offered by us from time to time (collectively, the “Services”). Your acceptance of these Terms occurs when you access or use the Services, or, if earlier, by clicking on an “I Agree” button or check box presented with these Terms. Upon taking any of the foregoing actions, you agree to be bound by this Agreement and any materials expressly incorporated herein.

If you access or use the Services on behalf of a legal entity or organization, you also represent and warrant that you are authorized to agree to these Terms on behalf of that legal entity or organization and have the power and authority to bind the legal entity or organization to these Terms.

1.2. Restricted Users

You represent and warrant that you are not: (a) located in, under the control of, organized in, or a resident of any jurisdiction that is comprehensively sanctioned or embargoed by the United States, the European Union, the United Kingdom (including HM Treasury / the Office of Financial Sanctions Implementation (OFSI)), or the United Nations; (b) a resident, national, or agent of Cuba, Iran, the Democratic People’s Republic of Korea (North Korea), Syria, or any Russian-occupied regions of Ukraine currently subject to comprehensive sanctions (including, without limitation, Crimea, the so-called regions of Donetsk and Luhansk, and the so-called regions of Zaporizhzhia and Kherson); (c) listed on, or owned or controlled (50% or more, directly or indirectly) by one or more persons listed on, any sanctions or restricted-party list maintained by OFAC (including the SDN List), the U.S. Department of State, the U.S. Department of Commerce/BIS, the European Union (EU Consolidated List), the UK HMT/OFSI (UK Consolidated List), or the United Nations Security Council, or any similar list issued by any other applicable national or supranational authority; (d) otherwise a citizen, resident, located in, or organized in a jurisdiction where your access to or use of the Services would be illegal or violate applicable law; or (e) subject to any export, end-use or end-user restrictions, anti-terrorism, anti-money-laundering, economic or financial-sanctions laws administered by any of the foregoing authorities (each, a “Restricted User”). We reserve the right to enforce

geo-blocking of the Services. You are prohibited from using any software or networking techniques (including a virtual private network (VPN), proxy, Tor, or similar) to modify your internet protocol address or otherwise circumvent, or attempt to circumvent, this prohibition. You acknowledge and agree that you will not hold us responsible for, and will indemnify us from, any contravention that may result from accessing the Services through a VPN or any similar means.

1.3. Early Access & Whitelist

Access to certain pre-release features may be limited to users included in a whitelist at our discretion. We may add, remove or re-verify addresses at any time; eligibility criteria may change without notice. If you are not eligible, you may be shown a waitlist form (e.g., to submit an email address) and you consent to receiving related communications, subject to our Privacy Policy.

2. DIGITAL ASSET WALLETS

2.1. Non-Custodial

To use certain functions of the Services, you must connect a compatible software application (or other mechanism) (“Digital Asset Wallet”). Your relationship with the provider of any Digital Asset Wallet you use in connection with the Services is governed by the terms and conditions of that provider’s agreement with you. By connecting a Digital Asset Wallet to the Platform, you agree to be bound by this Agreement. We reserve the right, in our sole discretion, to prohibit certain Digital Asset Wallet’s from connecting to the Platform or from interacting with any part of the Services.

2.2. Security

You are solely responsible for the custody of the cryptographic private keys associated with any Digital Asset Wallet you use or connect to the Services. You should never share your Digital Asset Wallet credentials or seed phrases with anyone. We accept no responsibility for, or liability to you, in connection with your use of a Digital Asset Wallet. We make no representations or warranties regarding how any of the Services will interact or operate with any specific Digital Asset Wallet.

3. THE PLATFORM

The Platform provides a web or mobile-based means to access software protocols that run on blockchain networks (collectively, the “Protocol”). The Protocol enables users to perform transactions with Digital Assets compatible with the underlying blockchain network. The Platform is distinct from the Protocol. The Platform is one but not the exclusive means of accessing the Protocol. The Protocol itself is composed of open-source or source-available self-executing smart contracts. You acknowledge and agree that we do not control the Protocol

and do not have control over Digital Asset transactions conducted on the Protocol. You also acknowledge and agree that your interactions or transactions including, without limitation, Digital Asset transactions, are not transactions with us.

From time to time, the Services may display or facilitate token offerings (each, an “Offering”). Unless expressly stated otherwise for a specific Offering, (i) TeraHash acts solely as the Platform operator and does not custody user funds; (ii) participation is subject to the eligibility requirements set out in these Terms, including sanctions/KYC checks and geoblocking; and (iii) in the event of oversubscription, allocations may be reduced on a pro-rata basis, and any excess may be refundable as described on the applicable Offering page or by the relevant smart-contract rules. If Supplemental Offering Terms are published for a specific Offering, those supplemental terms govern that Offering and will control in the event of any conflict with these Terms.

4. THIRD PARTY SERVICES AND WAIVER

The Services may include, without limitation, links to sites, technology, applications, products, services, materials, or resources, provided or made available by a third party including, without limitation, the Protocol (collectively, “Third Party Services”). Your access and/or use of a Third Party Service is subject to the terms and policies of the applicable provider of the Third Party Service. We do not control any Third Party Service.

4.1. Third Party Services

You acknowledge and agree that you are solely responsible for all costs and charges associated with your use of a Third Party Service. Our integration or inclusion of a Third Party Service does not imply endorsement or recommendation. You also acknowledge and agree that we are not responsible for the availability, reliability, accuracy, or legitimacy of any Third Party Service (including any related websites, resources or links displayed therein). Any dispute you have with a Third Party Service provider including, without limitation, your intellectual property rights, is between you and the applicable provider of the Third Party Service. We will not be responsible or liable for any damage or loss caused or alleged to be caused by, or in connection with, your use of, or reliance on, a Third Party Service. If, to the extent we permit, you permit a third party or Third Party Service to access or connect to the Services, you acknowledge and agree that granting permission to any third party to take specific actions on your behalf does not relieve you of any of your responsibilities under these Terms. You are fully responsible for any act or omission of any third party. You acknowledge and agree that you will not hold us responsible for, and will indemnify us from, any and all liability arising out of or related to any third party’s act or omission with access to your Digital Asset Wallet, application, software, or other mechanism that you use to interact with the Services.

4.2. Waiver of Claims

To the maximum extent permitted by applicable law, you waive any and all claims, demands, and damages of every kind or nature, known or unknown, suspected or unsuspected, disclosed or

undisclosed, against us and our affiliates, and each of our respective officers, employees, agents, and successors arising out of or in any way related to any of the risks set forth herein.

5. REWARDS

From time to time, we may make available promotional incentives for certain activities conducted via the Services (collectively, “Rewards”). Rewards are promotional in nature; they are not cash, legal tender, debt, securities, deposits, investment products; they have no cash or redemption value, are non-transferable, and may not be sold, assigned or pledged. Any statements, examples, or metrics relating to Rewards are illustrative only and not promises or guarantees; past performance is not indicative of future results and Rewards may be zero, and we do not guarantee that any Reward will accrue, vest, or be available on a continuous or uninterrupted basis. Rewards are subject to eligibility, geographic and sanctions restrictions, and any additional rules we publish for a given promotion (“Program Rules”); verification may be required, and we may withhold, deny, reverse, or claw back Rewards in cases of error, ineligibility, abuse, fraud, multi-accounting, self-referrals, circumvention of access controls, or violation of these Terms or the Program Rules. We may change, suspend, or cancel any Reward or promotion at any time in our discretion, and posting updated parameters constitutes notice.

5.1. Tiers & Limits

The Services may apply tiers, caps or rate limits to functionality or rewards eligibility. Such parameters are illustrative in marketing materials, may differ by user cohort and are subject to change without notice.

5.2. Referral Program.

From time to time, we may run a referral or promotional program. Program Rules will be published separately and form part of these Terms by reference. We may suspend, adjust, or terminate any program at any time. Rewards have no cash value, are non-transferable and may be withheld or clawed back in cases of abuse or ineligible participation.

6. RISK DISCLOSURES

You understand, accept, and agree to assume all of the various risks involved in using the Services and holding, transacting, and transferring Digital Assets including all of the risks set forth below.

- Digital Assets, the features, functions, characteristics, operations, use, and other properties and/or software, networks, protocols, systems, or other technology that Digital Assets interact with are complex; and the terms, features, or risks described herein are not a complete or exhaustive list of all such features, risks, or complexities and may not be

readily or fully understood due to such complexities.

- If you act as a liquidity provider through the Services, you understand that your Digital Asset may lose some or all value while supplied to the Protocol due to fluctuations in Digital Asset prices in a trading pair or liquidity pool.
- Staking rewards are not guaranteed and may be based on network performance, validator reliability, and other external factors. TeraHash does not assure any specific level of returns or profitability from staking activities.
- You understand that we do not create, own, or operate cross-chain bridges and we do not make any representation or warranty about the safety or soundness of any cross-chain bridge.
- Digital Assets will be irretrievably lost if sent to the wrong address. For instance, if the address is improperly formatted, contains an error, or for a different type of Digital Asset.
- Blockchain networks and Digital Assets may be subject to forks or attacks on the security, integrity, and/or operation of the networks, including any network events. These events may affect features, functionality, operations, use, or properties of any Digital Asset or network and/or the value of any Digital Asset.
- Collateral for decentralized finance protocols and projects may be higher than similar centralized protocols and projects.
- Any Digital Asset and/or the Services may be targeted by malicious persons or individuals who may attempt to disrupt the Services or steal Digital Assets. This includes but is not limited to malware, hacking, phishing, double spending, smurfing, spoofing, sybil attacks, social engineering, majority mining, mining attacks, distributed denial of service, and blockchain forks.
- The public nature of the Internet means that parts or the Internet may be unreliable or unavailable at any given time. Interruption, delay, corruption, loss of data, the loss of confidentiality or privacy through the course of data transmission, or malware transmission may occur when transmitting data via the Internet or other technology. This can result in your transaction(s) not being executed according to your instructions, at the requested time, and/or not at all. No technology is completely secure or safe.
- Digital Assets may decrease in value or lose all value, in a short period of time or permanently, due to various factors including, without limitation, government or regulatory activity, the discovery of wrongful or illegal conduct, market manipulation, price distortion, insider dealing, market distortion, malicious wrongdoing or behaviors, changes to the Digital Asset's nature or characteristics, suspension, or cessation of support for a Digital Asset by exchanges, public opinion, technical advancements,

macroeconomic and political factors, and other factors outside of our control

- Digital Assets held by a decentralized application and Digital Asset Wallets are not protected deposits and may not be protected by any deposit protection scheme. Thus, Digital Assets have a reduced level and type of protection compared to fiat and other asset classes or types.
- The creation of the Protocol may be abandoned for reasons including without limitation, lack of interest, funding, incapacitation of key developers or project members, lack of commercial success or prospects, or Force Majeure Event (defined below). You understand that there are no assurances regarding any benefit to interacting with the Services, even if the project and/or the Protocol was partially or fully developed and launched.
- The Services may undergo significant changes over time. We may also limit control over how other visitors and/or users can use the Services and what services are offered on or through the Platform. This could create the risk of the Services not meeting your expectations, for any number of reasons, including mistaken assumptions or analysis, a change in the design and/or implementation plans, or execution on or through the Services.
- We currently rely on our service providers for certain aspects of our operations including cloud computing services and data centers that provide facilities, infrastructure, website functionality and access, components, and services, all of which are critical to our operations. Like most other online companies, because we rely on service providers, we face operational risk. Any interruption in the services provided by our service providers can impair our ability to provide the Services.
- We do not directly manage the operation of the service providers we use including their data center facilities. Such third parties are vulnerable to financial, legal, regulatory, and labor issues, cybersecurity incidents, break-ins, computer viruses, denial-of-service attacks, sabotage, acts of vandalism, privacy breaches, service terminations, disruptions, interruptions, Force Majeure Events, and other events.
- Digital Asset transactions rely on smart contracts stored on various blockchains, cryptographic tokens generated by smart contracts, and other nascent software, applications, and systems that interact with blockchain-based networks. Such technologies are experimental, speculative, inherently risky, and subject to change. A defining feature of blockchain technology is its entries are immutable, which means, as a technical matter, they generally cannot be deleted or modified by anyone. You acknowledge and understand smart contracts dictate how funds and ownership of Digital Assets are distributed.

- You acknowledge and understand that you may be subject to scams and/or other types of fraud perpetrated by parties outside of our control. It is your responsibility to be aware of and protect against such misconduct. In the event that you are subject to such fraud, there is a risk of loss of your Digital Assets.
- All blockchain transactions include data and, in some circumstances, personal data about you. Many blockchain technologies store transaction data publicly and permanently. When you use such public blockchain technology, you intentionally make your transaction data public and acknowledge that this data cannot be deleted, removed, or reversed due to the nature of blockchain technology.
- You understand that smart contract transactions automatically execute and settle, and blockchain-based transactions are irreversible when confirmed. You acknowledge and accept that the cost and speed of transacting with cryptographic and blockchain-based systems are variable and may increase dramatically at any time. You further acknowledge and accept the risk of selecting your slippage rate which exposes you to additional cost or fees by the underlying blockchain network.

7. ACKNOWLEDGEMENTS AND COVENANTS

7.1. Acknowledgement and Assumption of Risks

In deciding to use the Services, you are not relying on advice or recommendations of ours, and you have made your own independent decision that using the Services is suitable and appropriate for you.

You represent and warrant that you fully understand all risks associated with using the Services and you have the necessary experience, understanding, and risk tolerance for using the Services including the necessary experience and knowledge to enter into any use or transaction regarding the Services. You acknowledge and accept any and all risks regarding the Services and are responsible for conducting your own independent analysis of the risks specific to your access or use of the Services.
